## British Embassy, Prague

The arrival of summer weather has enabled our photographer to do justice to the recently refurbished British Embassy in Prague 1. The reconstruction of all the external facades, windows and doors of this Baroque Palace was completed under the design and direction of IBA. During the works, previously-hidden 15<sup>th</sup> century wall paintings were uncovered and these have been carefully restored and left exposed as features.

## Hilton Prague, New Health Club and Spa

The IBA designed 'Cybex' Health Club and Spa has opened for business. The new 1,800 m<sup>2</sup> facility includes a new reception, bar, changing facilities, swimming pool, gym, aerobics area, squash court and a spa facility with 8 specialist treatment rooms and solarium. The centre offers guests and visitors an unrivalled range of services in state-of-the-art settings.

## Nagano Office and Technology Park, Phase 3

Construction work has commenced on this 13,000 m<sup>2</sup> project which includes a new office building and telehouse. The IBA-designed project forms the next phase of this development in Prague 3 by Red Group, which is scheduled for completion in June 2003.

## People

Eduard Trembulak has been promoted to Design Director of IBA. The 30-year-old architect has been with IBA for 4 years and has been responsible for leisure, retail and residential projects. Eduard is an accomplished designer who has won many international architectural competitions in his own right.
