

Kotva Rejuvenation

Building Permits have been issued for the rejuvenation of the Kotva department store in Prague. The ground level external areas and facades have been redesigned, including the revitalisation of the square in front of the building.

The projects are due to commence on site from February 2010 and the client is Markland.

IBA has completed this masterplan and scheme proposals for this 18 hectare site for client Amstar Europe.

The scheme proposes an integrated community of private houses, town houses, medium density apartment buildings and support facilities including shops, restaurants, kindergarden and a school.

A landscaped park connects a public square at the entrance to the development with existing leisure facilities along the riverbank to the south.
